

Polly tell us!

Check the other side
of this flyer for further
information!

HAVE YOU SEEN A NATIVE REGENT PARROT?

The regent parrot is a vulnerable species
that is found in Riverland floodplains
and mallee woodlands.

Every record will assist recovery efforts!

Join the Polly Tell Us project and report
sightings here (photos highly encouraged)

SCAN ME

What to look for...

Prominent yellow colour
(males)

Duller olive green
(females & juveniles)

Deep red bills

Blue-black wings & tail

Long dusky tapering tail

This project is supported by the Murraylands and Riverland Landscape Board through funding from the Australian Government's National Landcare Program and the landscape levies.

Polly tell us!

Report a sighting using these steps:

- 1 Use the **QR code provided** to navigate to the **Polly Tell Us portal** on the Atlas of Living Australia (ALA) BioCollect website.
- 2 Go to the **RESOURCES** tab to find the 'Polly Tell Us quick guide for use'.
- 3 Go to the **SURVEYS** tab to **add a new sighting**.

You can also provide sightings through the **BioCollect app**.

Download and search for the Polly Tell Us project.

Thank you!
